

UNPACKING INSTRUCTIONS

Your new TARGET mattress comes packed in two layers of plastic: an outer layer and a vacuum-sealed inner layer. Unpacking it is easy!

Cut the tape around the outer plastic casing, but be careful not to cut the mattress itself. Unroll the mattress, then cut and remove the outer plastic.

Using the supplied opening tool, carefully cut the second plastic wrap along the end seam. As air fills the mattress it will begin expanding.

Remove remaining packaging and allow up to 48 hours for the mattress to expand to its normal shape and feel.

WARRANTIES

All TARGET mattresses are covered by our comprehensive warranties. Visit targetfurniture.co.nz for full details.
